**MODERN VIDEO  
SECURITY  
SOLUTIONS**

Grundig Security, based in Erkrath near Düsseldorf, Germany, is an international company with advanced video security solutions for the video surveillance market.

Innovative technologies, excellent design, high quality products and ease of use are just a few of the reasons for the increasing popularity of our products.

FOR A GOOD REASON

**GRUNDIG**

# A SUCCESS STORY OF INNOVATIONS. REWRITTEN EVERY DAY.

More than 70 years and we're just getting started!

The original Grundig company was founded in 1945 and achieved world fame with its radios and televisions. Grundig is one of the world's leading providers of products in the areas of entertainment electronics, small electrical appliances and major home appliances. By expanding its product portfolio to the white goods sector, the brand became Europe's only full-range home electronics brand in 2013.

The Grundig brand has an outstanding reputation within the professional and consumer electronics markets. High-quality, exceptional functionality and simple operation are central to every Grundig product.

Innovative technologies, excellent design, high quality and ease of use are just a few reasons, why Grundig products are increasingly gaining in popularity. The product range of Grundig Security includes video cameras, recorders (NVRs, DVRs), monitors, software, transmitters, covering all the latest technologies.

Grundig Security products offer intuitive installation, set-up and operation. They are user-friendly and practical, with many installation benefits. These include vandal and weather-resistance, numerous mounting methods and extensive integration and compatibility.

# IP CAMERA TECHNOLOGY

IP technology greatly increases the effectiveness of video surveillance systems. Grundig has embraced this new technology and incorporated it into an extensive CCTV IP surveillance camera range.

Each Grundig IP camera has impressive functionality, meeting every current surveillance requirement.

Grundig network cameras offer outstanding image quality, even when rapid scene movement occurs. They offer a choice from 12 Mega pixel to 2 Mega pixel. 8MP (4K), 3MP and 2MP pixel camera version you get with realtime frame rate (30fps).

## SYSTEM SECURITY AND SAFETY

Grundig network cameras contain built-in security features for comprehensive data and network protection. System security features include an IP Filter for authorized user access to the camera's data; image transmission protection options; and the ability to create certified access levels to specific cameras and data within a system.

Each camera contains a Micro SD memory card, with no external access. Should a network failure occur, the video images can be safely recorded within the camera.

# EASE OF INSTALLATION

## QUICK AND EASY SET UP FOR A QUICK START

Grundig network CCTV cameras are designed for quick and simple installation. The IP cameras allow simple integration into most existing surveillance systems. Their network connections also enable remote software upgrades as new developments and enhancements occur.

Grundig IP cameras are compatible with the internationally recognised Open Network Video Interface Forum (ONVIF) standard.

The IP-based  
Security Standard

# SET UP AND CONFIGURATION

## EFFICIENT AND TIME SAVING CONFIGURATION PROCESS

Grundig set up software allows the user to adjust and monitor all the cameras' network settings, from a single menu page, eliminating the need for time-consuming and complicated configuration.

Each individual camera's configuration profile can be copied to other cameras in the same system, making large systems fast and efficient to set up.

Time, date and camera ID can be transmitted as part of the image data file for display in playback mode - essential for evidential purposes in some applications.

## MOBILE PHONE ACCESS WITH DYNDNS SERVER

A DynDNS server allows designated system users to access, view, monitor and control Grundig IP cameras from anywhere in the world, at any time. The images can be viewed via a web-enabled, standard mobile phone or Smartphone. Users are immediately alerted to any alarms, enabling them to react quickly, wherever they are.

## 2 Megapixel Full HD 18x Zoom Box IP-Camera ICR WDR

- 18x Auto Focus Zoom lens
- EXMOR™ sensor for low light sensitivity, XARINA™ DSP for advanced features
- High frame rate of 60 frames per second at Full HD resolution (1080p)
- WDR (Wide Dynamic Range) for extreme backlight situations
- Micro SD/SDHC memory card slot for alarm image recording
- RS485 Interface for controlling Pan and Tilt Units

### 4 MP Vandal Proof Fixed Dome Camera with IR LED WDR

- 4 Megapixel IP Camera with Full HD 1080P real time video
- Varifocal Lens: f = 2.8 - 12 mm
- 0 Lux: Integrated LED IR Illuminator to see even in total darkness
- Vandal Resistant Dome (IK10)
- Weatherproof Outdoor Installation (IP67)
- Built in analytics function, motion detection, trip wire, intrusion detection, tamper detection
- 3 Axis Gimbal, to mount on Wall or Ceiling

### 3 MP Full HD Integrated IP-Cam 3~9mm AFZ Modul P-Iris ICR IR LED

- 3 Megapixel IP Camera with Full HD 1080P real time video streaming
- Tamron P-Iris lens with Auto Focus Zoom Modul, for easy and precise remote settings
- Day/Night feature with IR cut filter removable, for higher sensitivity and vibrant colors
- 0 Lux: Integrated LED IR Illuminator to see even in total darkness
- Weatherproof Outdoor Installation (IP66)
- ONVIF Profile S protocol support, the most open Ip camera standard
- Bidirectional Audio Support

# IP RECORDING

Grundig offers an extensive range of IP recording solutions, based on either embedded Linux systems, for standalone use, or PC-based systems, pre-installed within the Grundig VMS, for larger applications.

Grundig's embedded NVRs are designed for installations of up to 32 cameras. The Connect range handles cameras with resolutions of up to 5MP and includes a 4 or 8 port, POE switch. The Professional range handles cameras with resolutions of up to 12MP. It includes greater processing power and increased levels of storage.

System storage can be increased by adding Network Attached Storage (NAS) devices. These can provide an additional 64TB of storage to our recorders.

The “Digital Spot Monitor” feature allows users to display video from all the system cameras, using just the bandwidth equivalent of a single, Full HD channel. The NVRs support Grundig, ONVIF, PSIA and many other protocols, making system upgrades quick and simple. Intelligent, event and alarm management features provide rapid search functionality, automatically triggering a series of agreed actions. Remote access for viewing and managing the NVRs is enabled using an intuitive, SCMS App and SCMS PC application. Connecting up to five GDS-X20 NVRs together enables a fully-functional system of up to 120 IP cameras.

The PC-based, VMS systems come with a pre-installed VDG license for each camera channel, with basic motion detection functionality included. Macros can be used to trigger a wide range of actions in response to different site events. The graphic layout can be customised to your needs and can react to any event. In addition to the built-in SATA drives, Network Attached Storage devices can be added to the system to increase the storage capacity.

The GDS-X30 series can be expanded with more channels and additional analytics for advanced motion detection, number plate and facial recognition. The system can be expanded by connecting a virtually unlimited number of servers together.

- Various recording features (Normal, schedule, motion, alarm)
- Controlled locally by USB mouse or remotely through Ethernet connection with CMS, Web page and Smartphone
- Video recording with NAS System and Local HDD
- Recorded files backup via USB device
- ONVIF protocol support
- SDK for Windows and Linux system

### DIMENSIONS (mm)

Operating System:	Embedded OS
IP Inputs:	4 channels
Video Outputs:	1x HDMI, 1x VGA
Harddisk bay:	1 x SATA II
Max. Storage Capacity:	68 TB (1x4 TB SATA and 8x8 TB NAS)
Video Compression:	H.264
Recording Resolution:	VGA (640x480), 4CIF (704x576), 720p (1280x720), 1.3MP (1280x960), UXGA (1600x1200), 1080p (1920x1080), QXGA (2048x1536), 5MP (2560x1920)
Recording Bandwidth:	max. 40 Mbps
Outgoing Bandwidth:	maks. 80 Mbps
Recording Mode:	Continuous, Event Alarm, Motion, Video Loss, Schedule
Display resolution:	Up to 1920x1080 (HDMI / VGA)
Display Speed:	4ch @ 1080p
Playback:	Synchronised playback of max. 4 cameras
Search Mode:	Date/Time, Event Alarm, Motion, Search Backup
External Backup:	USB HDD, USB Memory, USB External, DVD-ROM, Network
Event Source:	Motion, Alarm, Video Loss, System
Event Action:	Pop-Up, Relay, E-Mail, Buzzer, PTZ Preset
Motion Detection:	On/ Off/ Area Setting
PTZ Control:	Pan/Tilt/Zoom, Camera OSD, Preset set/call
Audio Inputs:	1 CH, RCA, 4 CH over IP
Audio Outputs:	1 CH, RCA
Audio Compression:	G.711
Alarm Inputs:	4 contact input N/O or N/C
Alarm Outputs:	1 Relay
ONVIF compliant:	Profile S, Profile G
Network Interface:	4x 10/100 Base T/TX PoE (RJ-45) + 1x 10/100/1000 Base T/TX (RJ-45)
PoE Budget:	15 W per Port, 50 W
Remote Connections:	Up to 128 (depending on available outgoing bandwidth)
Network Protocol:	IPv4, IPv6, TCP/IP, UDP, RTP, PPPoE, DHCP, DNS, DDNS, NTP, SADP, SMTP, SNMP, NFS, iSCSI
Multiplex Function:	Triplex
Serial Interface(s):	1x RS-485, 1x USB 2.0, 1x USB 3.0
Client software:	Windows® (XP, Vista, 7), Web Viewer: IE®, Firefox®, Safari®, Chrome®; Mobile: iPhone®, Android®
Operating Temperature:	-10°C ~ +55°C
Operating Humidity:	10% ~ 90%, non-condensing
Supply Voltage:	48 Vdc
Dimensions (W x H x D):	380 x 290 x 48 mm - 14.96 x 11.42 x 1.89 In:
Power Consumption (W):	10 (no HDD)
Weight:	1 kg - 2.2 lbs

## 16 Channel H.264 NVR with PoE switch

- Built in 8 Ch. PoE Switch for direct IP camera connection

## COMPABILITY

Grundig strives to provide bespoke solutions to every application, offering excellent compatibility of all its camera technologies to meet a site's needs. Grundig's TVI high definition recording solutions can be used within a system also containing analogue and IP cameras to create an outstanding, practical CCTV solution. Grundig's TVI range also offers seamless compatibility with other, third-party manufacturers of TVI cameras.

## INSTALLATION

All Grundig TVI cameras are easy to install and have a comprehensive range of accessories for quick and simple installation. Each camera offers Coaxial Control, for remote set up. Grundig's TVI recorders are compatible with both TVI and analogue cameras.

Grundig has developed its TVI high definition analogue solution, based on the HD-TVI, high definition, analogue standard. It enables reliable, long-distance analogue HD video transmission over coaxial cable.

TVI technology delivers up to 500 m, latency-free image transmission. Analogue users can enjoy HD without replacing their existing cabling structure or upgrading to IP.

One of the main benefits of TVI high definition, analogue technology is that there is zero loss of image data and zero latency when viewing live images.

This makes Grundig's new TVI cameras ideal for applications where evidential standard images are required, such as banks, casinos and retail environments, but where it is not viable or cost-effective to transmit the images over a network.

# ANALOGUE CAMERAS

## FEATURES

The Grundig 1000 TVL camera range takes analogue technology to the limit. It achieves the sharpest and most detailed images of any PAL cameras available today. The latest Megapixel Exmor sensors are used to provide detailed images, with little or no noise, even in poor lighting conditions.

Integral video analytics detects movement, tampering, video loss or covering of the camera itself. A built-in alarm output allows the camera to report such incidents to other devices. SMART infra-red technology prevents the over-exposure of objects close to the camera, in poor lighting, ensuring faces and other details can still be recognised.

## INSTALLATION

The camera offers flexible and simple installation, due to the dual voltage input and its remote configuration capability over the coaxial cable.

The HD-TVI recorders from Grundig connects with TVI, analogue and Full HD IP cameras. This enables incredible system flexibility, allowing for site upgrades from analogue to TVI and IP, or to create bespoke systems using a mix of technologies to suit operational and budget demands. The connect line offers to add 2 Full HD IP cameras, while the professional DVRs allow you to disable TVI or analogue channels and use IP instead, offering you a true tribrid system with up to 18 channels

Next to the internal storage you can add Network attached Storage devices to add additional 64TB of storage to any of our recorders.

A "Digital Spot Monitor" feature allows users to display the video from all the system cameras, using just the bandwidth equivalent of a single, Full HD channel. The DVRs support Grundig and other ONVIF IP cameras making system upgrades quick and simple. Intelligent event and alarm management features provide rapid search functionality, automatically triggering a series of agreed actions.

Remote access for viewing and managing the NVRs is enabled using an intuitive SCMS App and SCMS PC application.

The Grundig body worn camera is designed to capture essential information at any time and in any place. Equipped with built-in IR illumination, the camera offers 60fps, Full HD video recording in almost total darkness (zero Lux) conditions, whilst the built-in microphone records sound. The rugged camera casing is IP68-rated, so water and dust do not affect it.

All images, video and sound files are recorded on the camera's built-in, 32GB SD card in password protected files to avoid accidental deletion. The built-in screen and speaker can be used to check recorded evidence or display video for others to see.

## HD MONITORS

Starting at 10" and going up to 40", Grundig offers a comprehensive range of monitors to suit different applications. From a small preview monitor to a large video wall system, Grundig has the solution.

All our monitors offer a range of input options and have resolutions from 640x 480 pixels up to 4K.

## MONITOR EQUIPMENT

All models come with 24/7 rated power supplies and are equipped with low energy consumption LED illumination.

This ensures the monitors can be run all day, while consuming as little power as possible. LED illumination also ensures greater longevity for our monitors, compared to traditional CCFL illuminated monitors.

Some monitor models come with scratch-resistant, protective glass.

- 1 x 10/100 BaseTX Ethernet TP Port and 1 x 100BaseFX Ethernet Fiber Port
- Fiber Port can support Multimode wire with ST connector
- Full- and Half-Duplex selection on FX Port over a slide switch
- Providing 19" Converter Chassis for up to 16 slots with redundant power supply for optional expansion use
- Metal housing against vandalism

### DIMENSIONS (mm)

Network Standards:	IEEE 802.3, IEEE 802.3u
Interfaces:	1 x 10/100BaseT with RJ45 Connector, 1 x 100BaseFX with Multi Mode, ST Fiber connector
Wavelength:	850nm / 1310nm
Transmitter Output Power:	-20 ~ -14 dBm
Receiver Sensitivity:	max. -31 dBm
Power Budget:	11 dBm
Data Transfer Rate:	Ethernet: 10Mbps/Half-Duplex, 20Mbps/Full-Duplex, Fast Ethernet: 100Mbps/Half-Duplex, 200Mbps/Full-Duplex
Transmission Media:	100BaseTX Cat. 5/5e/6 UTP/STP, up to 100m
LED Indicators:	Power, Link up/Activity (TX and FX port), Full Duplex/Collision (TX and FX port), 10/100Mb/s
Supply Voltage:	5 VDC
Operating Temperature:	0°C ~ +60°C
Storage Temperature:	-20°C ~ +90°C
Humidity:	10 ~ 90% no condensation
Regulation:	CE, RoHS Compliant
Dimensions (W x H x D):	74 x 22 x 102 mm - 2.91 x 0.87 x 4.02 In:

# TERMS OF DELIVERY

Orders are only accepted subject to the Trading Conditions of ASP AG (Grundig Security, hereinafter called the "Supplier"). Purchasers of Supplier goods will, on accepting delivery, be deemed to have agreed that any printed conditions on their order or other documents shall only be binding where they are not at variance with these terms and conditions. Any buyer who objects to these terms below must, prior to delivery of goods, inform the Supplier of the objections in writing whereupon the order shall be deemed to be cancelled unless any proposed variation is accepted in writing by a Director of the Supplier.

1. **PRICES.** Prices charged for orders will, unless otherwise specified, be those ruling at the date of acceptance of that order. Quantity rates may apply once to each individual order and each delivery. Orders and deliveries may not be aggregated to obtain quantity rates. Prices quoted are exclusive of Value Added Tax. All prices quoted and charged are subject to payment being made within these terms. In the event of payment being overdue by 30 days or more then such prices are liable to re-calculation at the Supplier's pricing ruled in its price list current at the end of 30 days.

2. **ORDERS.** All orders shall be subject to the Purchaser being credit worthy, as determined by the Supplier. An order is only formerly accepted by the Supplier when a delivery date for the order is confirmed and communicated to the Purchaser. From time to time, upon request by the Supplier, the Purchaser shall furnish the Supplier with such financial information requested by the Supplier as will enable the Supplier to evaluate the Purchaser's financial status.

3. **SHIPMENT.** Shipment will only be made by the method of the Supplier's choice, unless otherwise agreed. Shipment will be made to any one of the Purchaser's permanent addresses. Every effort will be made to effect delivery on the delivery date communicated, or to any programme of dates agreed. However, no guarantee of delivery dates can be given and time of delivery is not of the essence of the contract. Failure to deliver on the communicated date shall not invalidate the contract or any remaining or outstanding deliveries.

4. **PAYMENT.** All monies are due to be paid not later than 30 days from the end of the month following the date of invoice, unless otherwise agreed in writing. Payments shall become immediately due upon commencement of any proceedings or any commission of any act in which the Purchaser's insolvency is involved.

5. **TITLE TO GOODS.** Until the Supplier has been paid in full for goods comprised in the order or in any other sales contract between the Supplier and the Purchaser or until title to goods is in terms relinquished to the Purchaser by the Supplier by writing under the personal hand of a / the Director of the Supplier;

a) The goods comprised in the order remain the Supplier's property and the Supplier reserves the right to dispose of the goods as the Supplier sees fit.

b) The Supplier may repossess (and for this purpose follow or trace) the goods at any time from the Purchaser, if in his possession, if the Supplier considers the amount outstanding is in excess of the credit limit and overdue for payment. The Supplier, its servants and agents may enter the Purchaser's premises where the Supplier has reason to believe any of the goods are situated.

c) The Purchaser as bailee undertakes to keep the goods safe and in good order and condition and clearly identified as the Supplier's property.

d) Should the Purchaser have passed the goods or any part of them to a third party (or have incorporated them in work for a third party) this will be deemed to have been done as the Supplier's agent only and any sums received by the Purchaser in respect of such goods or such work shall be held in trust for the supplier until all sums due to the Supplier are discharged.

e) Upon commission of any act of bankruptcy by an individual Purchaser the immediate repossession of the goods shall forthwith, automatically, revert to the Supplier.

f) All costs (including legal fees) occasioned in the recovery of goods shall be paid by the Purchaser.

6. **WARRANTY.** A warranty applies only to the Purchaser from the Supplier and where the goods are covered by a warranty. The warranty period for goods is 3 years, except for fully functional domes and recording equipment hard drives where the warranty is 1 year. The terms of such warranty shall be deemed to be part of these conditions. The Supplier warrants all goods to be free from defects in material and workmanship under normal use, provided the products have been installed and operated in accordance with the instruction manual. The commencement date for all warranties is the date of delivery to the Purchaser from the Supplier. The Supplier makes no other warranty, express or implicit, with respect to the goods, their marketability, quality or fitness for any particular use or purpose. In particular, but without prejudice, to the general provisions of these conditions no responsibility is assumed for incidental or consequential damage by reason of any warranty expressed or implied.

7. **CLAIMS.** Claims may be made subject to the Purchaser;

a) Examining the goods on their delivery for any obvious damage or shortage and reporting any damage or short delivery in writing to the Supplier and the carrier within five days of the delivery date.

b) Reporting non-delivery by telephone (and confirmed in writing) to the Supplier within 10 days of the invoice date or expected delivery date. If the Purchaser fails to give notice or to report in accordance with these terms or shall deal with goods in any manner or if there shall be any conduct by the Purchaser inconsistent with rejection of the Goods, then the Goods of the quality specified in the contract shall be deemed to have been delivered to the Purchaser. No claim or rejection, properly made pursuant to these Conditions of Supply in respect of any part delivery of Goods shall be a ground for cancellation of the contract or order.

8. **RETURNS.** Returns for credit are only permitted after the Supplier has provided a Returns Authorisation (RA) number. Such returns must be sent to the Supplier with freight paid in an unused condition. A re-stocking charge of up to 15% will be applied to all returns. A higher rate may apply if the return requires re-packaging. Returns on products over 3 years old will not be accepted. No software on which seals have been broken can be returned for credit. Please note Software Licenses are non-returnable.

9. **RIGHT OF CANCELLATION.** Rights of cancellation of the Supplier will become operable if the Purchaser should fail to meet his obligations as they fall due for any reason or if any distress or execution shall be levied upon the Purchaser's property or if the Purchaser shall commit an act of bankruptcy or being a limited company any resolution or petition to wind up its business shall be passed or presented (excepting winding-up for the purposes of reconstruction) or if a receiver of such company's undertaking property or assets shall be reimbursed for any fair and reasonable costs occasioned due to such cancellation.

10. **LIABILITY.** The Supplier shall under no circumstances be liable for any consequential or indirect damage or loss, however caused, including (but not restricted to) loss of profits, loss of goodwill, damage to trading relationships and financial loss. The Supplier's liability in respect of all other losses shall be limited to the invoiced value of the relevant order.

11. **FORCE MAJEURE.** The Supplier shall not be responsible or liable for its failure to perform its obligations, if such failure is beyond the control of the Supplier, whether caused by acts of God, unavailability or shortages of materials or energy necessary to produce and/or deliver goods by usual modes of transportation, fire, flood, war, embargo, strikes, labour disputes, explosions, riots, of Laws, rule regulations, restrictions or orders of any Governmental authority, or any other cause, other than financial, beyond the control of the Supplier and its suppliers.

12. **RELATIONSHIPS.** Relationship is that of the Supplier and Purchaser, and neither the Supplier or the Purchaser nor any of their employees, customers or agents shall be deemed to be the representative, agent or employee of the other for any purpose whatsoever, nor shall any of them have any right or authority to assume or create an obligation of any kind or nature, express or implied, on behalf of the other, nor to accept service of any legal process addressed to or intended for the other, nor to pledge the other's credit. The Purchaser warrants and represents that there is no legal impediment preventing acceptance of these terms and conditions of supply and that the acceptance of these has been duly authorised and that the obligations do not conflict with or violate any terms or conditions of any other agreement or commitment by the Purchaser.

13. **ARBITRATION.** These Terms & Conditions are governed by German law. Any dispute not settled by the parties shall be submitted to arbitration at the Düsseldorf Chamber of Commerce in Germany and shall be settled according to the laws of Germany.

14. **ADVANCED REPLACEMENTS AND REPAIRS.** Advanced replacements only apply on products which are no older than 3 months of the invoice date. Repairs only apply on products which are no older than their warranty period of 1 or 3 years.

15. **ERRORS AND OMISSIONS.** The Supplier makes every effort to ensure that all prices and descriptions quoted in printed form and on its website are correct and accurate. In the case of an error or omission, the Supplier will be entitled to rescind the contract, notwithstanding that he has already accepted the Purchaser's order, and the Supplier's liability in that event will be limited to the return of any money the Purchaser has paid in respect of that order.
